

ARG Interactive

ARG provides a web based CRM solution, websites, and referral marketing services specific to the mortgage industry. The NYLX – ARG interface allows users to price loan scenarios easily and without the re-keying of loan information:

1. Select a loan from the “my leads” page in the ARG site:

2. Once the lead is open, select the loan pricing icon at the top of the page to price the loan.

- The ARG system populates Borrower and transaction information in NYLX, opens the NYLX transaction form, and the loan is ready to price:
